## Today's Scoop

November 27, 2007

### Well-B(Red) Dog

If you love cutting-edge design (don't we all?) you'll love the organic-shaped "Yum" bowl in in. It's microwave safe and non-skid.

Once Fido finishes his fantastic food fineries and licks his "Yum" bowl clean, he'll want to move on for a king-size snooze. Not just any snooze, but the most luxurious, elegant snooze money can buy in this oh-so-fab Revolution Bed, inspired by no less than architectural icons Charles and Ray Eames. Made with big dogs in mind, it's equally popular with smalls who want to curl up together. Reversible microsuede cover zips off for machine washing or just to switch color schemes, and water-resistant nylon shell fights odors.

If you really want to raise the bar, get not only the bowl and bed but also the Name Collar, which is exclusive to Red Dog House in Chicago. So, even while he's asleep your pooch can radiate style in this made-to-order, Euro styled leather collar that comes in a variety of sizes, a multitude of colors and shiny nickel letters.

All 3 take ordinary everyday items and turn them into fine art, meaning you and your best friend can get your glam on together at Red Dog House, either in-store or online.
